## *Chairman's Corner*

It's good to see a vast number of Wheelie Bins proclaiming that this is a Neighbourhood Watch area. I hope that this will act as a reminder to those who received one in the last Lookout and have not yet got round to attaching it to their bin. Displaying such signs does promote that we are an active Neighbourhood Watch and can reduce criminal activity.

Your committee is now purchasing additional Wheelie Bin stickers which means that all members of the Watch should have a 'stickered' Wheelie Bin. It is hoped to distribute these in November.

We are now turning our attention to lamppost signs. Although we have a good coverage of Neighbourhood Watch signs in the area we have two issues to address – badly weathered signs and missing signs. We are looking to replace the weathered signs – some of which are unreadable.

We have also identified that there are up to 10 signs missing from the Muir Wood end of the Watch. These were 'stolen' when the lampposts were replaced. The Council has now agreed to replace them free of charge.

.... and finally: a reminder that, as we approach the end of our all too brief summer and the longer autumn nights, it's time to review our home security by making sure that external security lights work, and that garden sheds, doors and windows are suitably secured.

## *In Case of Emergency*

A campaign is under way to encourage people to store certain personal details on their mobile phones.

Accident victims and the sick are often unable to communicate with the emergency services who attend them. These rescuers frequently sift through the victim's mobile phone to try to identify the individual and to contact members of their family. One British paramedic reasoned that, since this was a very hit-and-miss action, it would be a good idea for mobile owners to have an identifiable contact listed on their phones under a uniform heading. The present aim is to encourage everyone to store a contact number under ICE (**I**n **C**ase of **E**mergency) to enable the emergency services to identify you and to advise your relatives.

This concept has spread as far as the USA and Australia. Mobile phone manufacturers are being urged to add ICE headings to their phones.
